

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

Claim 1 (previously presented): An inflatable product, including:

 a first chamber comprising a chamber wall;

 a pack having an interior region, an air intake communicating the interior region to the outside of the first chamber and a first air outlet communicating the interior region to the inside of the first chamber, wherein the pack is built in the chamber wall and extends into an interior of the first chamber;

 a first valve for opening and closing the first air outlet, wherein the first valve is connected to the pack; and

 a fan and motor disposed in the interior region of the pack, wherein, on activation of the fan and motor to inflate the first chamber, air is pumped from outside of the first chamber through the air intake into the interior region of the pack, then through the first valve and first air outlet into the first chamber.

Claim 2 (previously presented): The inflatable product as claimed in claim 1, further including a second chamber, and the pack further having a second air outlet communicating the interior region of the pack to the second chamber, wherein, on activation of the fan and motor to inflate the second chamber, air is pumped into the second chamber through the second air outlet.

Claim 3 (previously presented): The inflatable product as claimed in claim 2, further including a second valve for opening and closing the second air outlet.

Claim 4 (previously presented): The inflatable product as claimed in claim 1, further including a second chamber and a two-way valve device connected between the first and second chamber so that the air in the first chamber flows into the second chamber through the two-way valve device.

Claim 5 (previously presented): The inflatable product as claimed in claim 1, further including a valve switch to open the first valve.

Claim 6 (currently amended): The inflatable product as claimed in claim 5, wherein the valve switch includes a cam element, a bar and a spring, the cam element is rotatable ~~rotated~~ between a first orientation and a second orientation, and when the cam element is in the first orientation, the bar is depressed by the cam element, and the spring is compressed by the bar to open the first valve.

Claim 7 (previously presented): The inflatable product as claimed in claim 6, wherein the cam element has a recess, and when the cam element is in the second orientation, the bar is pushed by the spring and received in the recess to close the first valve.

Claims 8-11 (canceled)

Claim 12 (currently amended): The inflatable product as claimed in claim 5 ~~[[11]]~~, wherein the valve switch includes a spring, the valve switch is moveable between a first orientation and a second orientation, and when the valve switch is in the first orientation, the spring is compressed to open the first valve.

Claims 13-15 (canceled)

Claim 16 (currently amended): The inflatable product as claimed in claim 18 ~~[[15]]~~, wherein the valve switch comprises a cantilever arm, and the cantilever arm is rotated to selectively depress the first valve or the second valve for selectively opening the first valve or the second valve.

Claim 17 (canceled)

Claim 18 (previously presented): The inflatable product as claimed in claim 3, further including a valve switch to selectively open the first valve or the second valve.

Claim 19 (canceled)

Claim 20 (previously presented): The inflatable product as claimed in claim 1, wherein the first valve is a two-way valve.

Claims 21-22 (canceled)

Claim 23 (currently amended): The inflatable product as claimed in claim 1 [[8]], wherein the first valve is arranged to allow manual opening and closing of the first air outlet.

Claim 24 (previously presented): The inflatable product as claimed in claim 1, wherein the pack comprises a pack wall exposed to the outside of the first chamber, and the air intake communicates the outside of the first chamber to the interior region of the pack through the pack wall.

Claim 25 (previously presented): The inflatable product as claimed in claim 24, further comprising a control switch to activate the motor, wherein the control switch is disposed on the pack wall.

Claims 26-27 (canceled)
